Pros
===
- Really innovative tactical strategy battle mechanic. We've never seen something like this before. I hope more professional game designers will take a look at this and get inspired.
- A quirky but consistent art direction.

Cons
====
- Amateurish, unorganic writing. Quite a fair bit of grammatical errors and doesn't really pack an emotional punch.
- Sterile scenes due to a lack of static animations (e.g. blinking eyes, etc would really help).
- Quite boring overall due to a lack of plot or emotional highlights.. Trial & error game with only 2 buttons fun for 10 mins then boring. Charming little game, with a relaxing concept. I loved hanging with my new friends in my monster garden. No spoil for the end, but it is the best way to finish the game.. Picked this up after a recommendation from a twitter follower. There was a bit of a learning curve with the fighting but once I got the hang of it I found myself thinking about the game often when not playing the game and it kept me wanting to come back. Music choices are great, the art direction is great, and the creator did a great job making me love Ringo and his posse.. Got this game for under £2 and for that money was well worth getting. Not the best game by a long shot but clever in what it does. The only down side is the lack of instructions (even after readin the online manual) it does not tell you what the different items do that you can purchase, or how to use them. The game is 'like' Boulder Dash but harder. The rocks cause instant death if you push the dirt away from under them. The different Retro Styled looks to the game is what made me buy it, and they work great. Nice game to play for 10 minutes or so.. Does not work on windows 10. Waste of money.

smash\u2665\u2665\u2665\u2665\u2665with the boys grape game would sleep with devs daughter. Part of the Grand Campaign series, this add-on follows from GC 1940 with the non-historical invasion of Britain. The style is very much Grand Campaign - lots of smaller scenarios than in the main game, with a wider variety of objectives - but felt much larger and slightly more challenging than the first two in the series. The disadvantage is that, because it is non-historical, there is no proper link back into the Grand Campaign, although on the Slytherine website there is a mod which overcomes this. The ending suggests that there might be a follow-on campaign in due course.

The bottom line, in my view, is that if you enjoy Panzer Corps then this DLC is highly recommended and excellent value.. Take a look at Biglands here http:\/\/youtu.be\/MuFEMWrCR0E. game is fun but could use some vibrations and sound effects could make a huge difference. For a game this cheap....
You are getting into...
- a great soundtrack
- stable fps
- pugs
- more pugs
- great developers
I am a huge fan of the original pug game and I love this one just as much.. music is extremely good and affects the way you play the game

please update it so the song from dark is on it. Hello Friends! I write about this great and fun platformer game, Grow Home! A charming platformer with a cute playable character called B.U.D. It is a robot that you control to jump and collect biological samples off the planet. Also, your main mission is to grow a plant all the way back to the spaceship, all while jumping and avoiding falling down. Probably one of the best 3d platformers on pc you can get as i doubt we will get any super mario bros. games on pc. The characters are cute, the graphics are nice, and the comments when you fall off and break are funny by M.O.M.. This game is child friendly, which means a young child could enjoy this game without things like violence and such. There is one scene where you can get attacked by a creature, but that is it. Anyways, a great platformer game. It was so good, they made a sequel called GROW UP! Check it out on steam, as they sell it!

I recommend this game because of the cute graphics and fun 3d platforming. Have a great time playing this one!

NOTE: This game does not require UPLAY to play it on steam, nor does it have a cd key to unlock it on UPLAY.. can not play it says it is running will not start crap. Interesting graphics, simple game play, puzzles pretty basic but still fun if you like gear\/pulley\/physics based puzzles

Small hotfix for servers:
I updated with just a small hot fix for servers.

- Anti-cheat was banning players for no reason if the server was running at low FPS. This has been fixed and tested.

- Occasionally, servers will have a map corruption error when the map isnt actually corrupted, thus stopping the server for no reason. The server will automatically restart when this error happens. So if your server enters a restart loop, your maps probably ARE actually corrupted. If you have logging enabled, the error will appear there instead to confirm.

- You may have noticed banned.txt is now bm_settings.ini_banned.txt. This is for running multiple servers with different config files, so each server has its own ban list. Not as convienient as a global ban list, but it was causing file writing issues.

- Lastly, you may have also noticed symbols at the end of IP address bans. These symbols help you determine what ban method was used quickly.

@ = Anti cheat ban$ = Vote banNone = Banned by server owner. **Star Shift 0.39 Update**:
Thank you to everybody who has alpha tested our game so far. A number of small bugs have been brought to our attention and they are now patched with this update.

1. First level being too hard.
2. Items not disappearing when used in battle.
3. Addition of item drops for enemies.
4. Walking through walls on certain maps.

As a workaround for now, if you experience combat balancing difficulties, there's a difficulty slider in the options menu.

Version 0.4 will be coming out in a few weeks and will have many more improvements added. The 0.39 build fixes the biggest 0.38 bugs.

Thank You,
Psychronic Game Studios
