This is singlehandedly the worst game i have ever had in my library and a piece of impudence to offer it to the market..

0V10. Even kids don't like it.. Did you even test certain levels like level 5? Some jumps are literally impossible to make. I've spent \$0,20 on this game, and it was not worth it...

Minus points:

- Bad gameplay
- Impossible levels
- So many bugs

Plus point:

- Nice animations
- Simple platform game which is fun
- The game is cheap AF. >Loads Game
- >No Instructions, Seems Legit.
- >Level 1, Dies seven times.
- >Friends Talking\u2665\u2665\u2665\u2665\u2665over Discord

- >Friends still talk\u2665\u2665\u2665\u2665\u2665to this day. Very bad. No music, very poor collision detection. A platformer where I continuously fell through platforms if not in the exact center. Refunded immediately.

I idled at the menu screen since I had to play at least five minutes to post this review.

am i the only person who completed the game, you can jump further by doing a 180 in air and jump higher if you hit air. Lmao who made this :B:

Pros:flex on em lil kids when you beat it

Cons: there are microscopic triangles that do damage
